

Dear Purple Class,

I'm missing you all terribly. Life is so boring without the business of the classroom and the joy that you all bring.

I hope you're all well and being as good for your parents as you are for me.

Make sure you are keeping a diary of things you have been doing each day
Please do a book review of something you've been reading at home. Make sure you include the name of the book, author, and who were the main characters? What was the best part of the story? Make sure you do a picture of your favourite part, too.
Try making your own story books by folding paper.

Our current topic in maths is shape so see if you can spot 2D and 3D shapes around the home. Have a go at counting the faces, edges and vertices (corners) of the shapes you find. Are the sides straight or curved?
For 3d shapes; how many faces? How many edges? How many vertices?
What are the most common shapes that you can find at home? Why do you think that is?
Don't forget to count forwards and backwards in 2s, 3s, 5s and 10s.

Help your parents to do some cooking that involves lots of maths, measuring, time etc.

Also make sure you look at 2code if you can on your computer (purple mash). You should all try the air traffic control and see how far you can get. I will be setting up activities for you and will be able to see you work soon.

Make sure you're getting involved with tasks in your house like gardening, cooking and tidying up.

See you all soon,

Love Sarah
